Bachelor Of Computer Science
Denmark Technical University (DTU)

2016 - 2019
Biotechnology high school diploma
Nærum Gymnasium

LANGUAGE

- English
- Danish

ABOUT ME

I am an enthusiastic and curious software technology bachelor's student, on my fifth semester at DTU, which has given me a broad set of tools when it comes to developing software. I have a lot of knowledge about developing with C# and .NET as I have been making web projects for a while.

Alongside my studies I spend time with my family and friends. I'm also very active and play badminton, go to the gym and run regularly. As a person I'm ambitious, determined and positive by nature. I'm also approachable, outgoing and not afraid to ask.

I am interested in an internship as a software engineer at your company.

SOFTWARE PROJECTS

Solitaire Assitant App
An Android Mobile App. in Java, that can solve a game of solitaire via image recognition (ML with Python).

Monopoly Webapp
An React Native Webapp written with typescript and .NET where you can play monopoly online with your freinds. Uses REST API

Python Utility Tools
All kinds of tools that have made my live easier. Webscrapers with selenium. File formatting programs, and automated testing for Webapps with Chrome Driver

WORK EXPERIENCE

Front End developer, Career mentor LLC.   2021 - 2022

An Android Mobile App. in Kotlin, a replica of the Careermentor.dk website. Make use of the website's Firebase DB, with real-time chat, login auth. and matching function. It makes use of MVVM software architecture.

Technical support, Webhelp inc.   2020 - 2020

Helped customers solved technical issues over the phone. Learned crisis management and formulating technical terms to less technical people

MY SKILLS & EXPERTISE

Java	SQL (MySQL, NoSQL)	Full Stack Mobile and Web App. development
Kotlin & Jetpack Compose	UML & design patterns	
Java-/Typescript (ReactJS, NodeJS)	Backend development & distributed systems	UI/UX Design
	C# and .NET	Data Visualization
